

COMMON NETWORK PROTOCOLS

ftp

20/21

tcp

- File Transfer Protocol: Used for transferring files between client and server.

sftp

22

tcp

- Secure File Transfer Protocol: FTP over SSH for secure file transfer.

tftp

69

udp

- Trivial File Transfer Protocol: Simple, unsecured file transfer protocol.

ssh

22

tcp

- Secure Shell: Secure remote login and command execution.

telnet

23

tcp

- Teletype Network: Unsecure remote login and command execution.

smtp

25

tcp

- Simple Mail Transfer Protocol: Used for sending emails.

smtps

587

tcp

- Simple Mail Transfer Protocol over TLS: SMTP over Transport Layer Security (TLS) for secure email transmission.

pop3

110

tcp

- Post Office Protocol v3: Receiving emails by downloading them from the server.

pop3s

995

tcp

- POP3 over SSL: Secure POP3 for email retrieval.

imap

143

tcp

- Internet Message Access Protocol: Accessing emails directly on the server.

imaps

993

tcp

- IMAP over SSL: Secure IMAP for email access.

http

80

tcp

- Hypertext Transfer Protocol: Unsecure web browsing.

https

443

tcp

- Hypertext Transfer Protocol Secure: Secure web browsing with Secure Sockets Layer (SSL) or TLS.

dns

53

tcp/udp

- Domain Name System: Used for resolving domain names to IP addresses.

dhcp

67/68

udp

- Dynamic Host Configuration Protocol: Used to assign IP addresses dynamically.

ntp

123

udp

- Network Time Protocol: Synchronizing clocks over a network.

ldap

389

tcp/udp

- Lightweight Directory Access Protocol : Accessing and managing directory information.

ldaps

636

tcp/udp

- LDAP over SSL: Used for secure LDAP access.

snmp

161/162

udp

- Simple Network Management Protocol: Used for network management and monitoring.

syslog

514

udp

- System Logging: Network event logging system and protocol.

smb

445

tcp

- Server Message Block: File sharing and network communication.

sql

1433

tcp

- Structured Query Language (SQL) Server: Database management system by Microsoft.

sqlnet

1521

tcp

- SQLNet (Oracle Network Service): Enable Oracle SQL clients to communicate with the Oracle database server.

mysql

3306

tcp

- MySQL: MySQL database service.

rdp

3389

tcp/udp

- Remote Desktop Protocol : Remote desktop access.

sip

5060/5061

tcp/udp

- Session Initiation Protocol: Used for managing multimedia communication sessions.
