

GIT CHERRY-PICK VS MERGE VS REBASE

CHERRY-PICK

\$ git cherry-pick C5

Cherry-Pick
Only picks **C5** commit

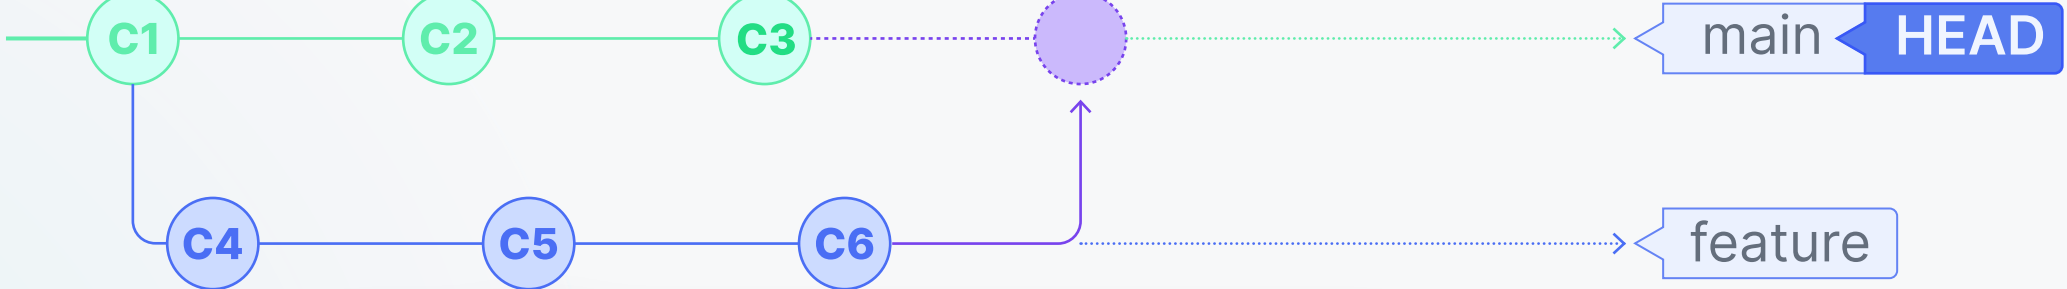

COMMIT

\$ git commit

Merge commit

Takes **C4** , **C5** and **C6** commits them to the main branch.

REBASE

\$ git rebase main

Rebase commit

Sames a merge, but moves the entire feature branch to the tip of the main branch maintaining linear log history
